Sample Description:

1. Bamboo Toilet Paper

Note: n.d. = not detected
@ PFAS classified as both PFOA-related compounds and C9-C14 PFCA-related substances
§ PFAS classified as both PFOA-related compounds and PFHxA-related substances
^ As the extraction is performed with Methanol, EtPFOA will convert to MePFOA. Thus, the sum of both must be calculated and considered.
^^ 8:2 FTSiCl3 can not be analytically distinguished from 8:2 FTSi(OCH3)3 with current method. Thus, the sum of both must be calculated and considered.

Decision Rule: When statement of conformity is made, unless the decision rule was mentioned in above specified test items, the decision rule would be based on the non-binary statement with guard band (is equal to the expanded measurement uncertainty with a 95% coverage probability, w = U95) in ILAC-G8:09/2019 Clause 4.2.3.

"Pass - the measured value is within (or below / above) the acceptance limit, where the acceptance limit is below / above to the guard band." or "Pass - The measured values were observed in tolerance at the points tested. The specific false accept risk is up to 2.5%."

"Fail - the measured value is out of (or below / above) the tolerance limit added / subtracted to the guard band." or "Fail - One or more measured values were observed out of tolerance at the points tested." The specific false reject risk is up to 2.5%."

"Guarded Pass if the result is within the uncertainty passing band close to the specification."

"Guarded Fail if the result is within the uncertainty failing band close to the specification."
